

Stillwater Solutions™ addresses a market need that has never been fully satisfied...until now. Superfly™ is pleased to offer the Stillwater Solutions™ Dealer Program, which has been carefully researched and designed for success.

Developed by **Brian Chan & Phil Rowley**, Stillwater Solutions™ is a complete line of over **135 Premium Fly Tying Products** designed to meet the specific needs of lake fly fishers. The program consists of 6 core colours imperative for stillwater fly fishing: Brown, Callibaetis, Light Olive, Olive, Olive Dun and Tan. Additional effective colours have been added throughout the product range to provide a full spectrum of options for lake fishing everywhere.

*"Stillwater fly fishers must ply their skills in one of the toughest classrooms, where food sources not only vary from lake to lake, but also within specific regions of a lake. Successful patterns must be constructed from materials and colours with these fluctuating conditions in mind. Our development of Stillwater Solutions™ finally offers a comprehensive and effective selection of products that fly tyers need for success on the water."*

**New this fall...**

### GRIZZLY MARABOU

This Marabou's barred appearance is ideal for matching the mottling on many stillwater food sources such as damsel and leech tails. Place the aftershaft plumes in a dubbing loop to create mobile thoraxes on mayfly and damsel fly nymphs.

SW-0801210	Brown	SW-0801000	Natural
SW-0801500	Burnt Orange	SW-0801080	Olive
SW-0801490	Callibaetis	SW-0801070	Olive Dun
SW-0801460	Light Olive	SW-0801280	Tan

**Strip the fibres from the Long Marabou plume to form tapered bodies.**

### LONG MARABOU

Long Marabou is a standard for long flowing tails on leeches, minnows or damsel nymph patterns. The long length provides maximum control for the tyer.

SW-0802120	Black	SW-0802060	Golden Olive
SW-0802210	Brown	SW-0802460	Light Olive
SW-0802500	Burnt Orange	SW-0802080	Olive
SW-0802490	Callibaetis	SW-0802070	Olive Dun
SW-0802200	Claret	SW-0802280	Tan
SW-0802090	Dark Olive		

**Strung Marabou makes a great shellback for a variety of nymphs or pupa.**

### STRUNG MARABOU

This select Marabou is ideal for making bodies of damselflies, mayflies, leeches and scuds. The colour selection covers many stillwater and river food sources of Trout and other species.

SW-0803120	Black	SW-0803060	Golden Olive
SW-0803210	Brown	SW-0803460	Light Olive
SW-0803500	Burnt Orange	SW-0803080	Olive
SW-0803490	Callibaetis	SW-0803070	Olive Dun
SW-0803200	Claret	SW-0803040	Red
SW-0803090	Dark Olive	SW-0803280	Tan

**Mix Ostrich Herl colours to create a mottled effect.**

**Bleached white Ostrich is perfect for all sizes of chironomid pupa.**

### OSTRICH HERL

The perfect material for smaller stillwater patterns. The individual fibers move and breathe on their own making Ostrich ideal for callibaetis nymphs, damselflies, water boatman and scuds. Plumes are hand-selected for smaller patterns.

SW-0804000	Bleached White
SW-0804210	Brown
SW-0804490	Callibaetis
SW-0804460	Light Olive
SW-0804080	Olive
SW-0804070	Olive Dun
SW-0804280	Tan

**Partridge is an excellent choice for tails, throats, wet hackles or a variety of larva, pupa and nymph patterns.**

### PARTRIDGE

The soft texture and comprehensive colour selection are perfect for creating many stillwater and river patterns. An excellent choice for tails, throats, wet hackles or variety of larva, pupa and nymph patterns.

SW-0805500	Burnt Orange
SW-0805490	Callibaetis
SW-0805200	Claret
SW-0805460	Light Olive
SW-0805080	Olive
SW-0805070	Olive Dun
SW-0805280	Tan

**Use tips of the Marabou for tails, twist or spin the long fibres to form a body or make dubbing for life-like bodies.**

## MOTTLED TURKEY FLATS

The perfect material for tails and legs on both mayfly and damsel nymph patterns. Provides form and movement suggestive of these features. The Stillwater Solutions™ colours completely cover food sources in stained or clear waters.

SW-0808490 Callibaetis  
 SW-0808460 Light Olive  
 SW-0808080 Olive  
 SW-0808070 Olive Dun  
 SW-0808280 Tan

## MOTTLED TURKEY QUILLS

The mottled appearance is ideal for wing cases and bodies on many stillwater patterns. Tie different fibres in by the tips to create slender variegated bodies on callibaetis nymphs.

SW-0809490 Callibaetis  
 SW-0809460 Light Olive  
 SW-0809080 Olive  
 SW-0809070 Olive Dun  
 SW-0809280 Tan

**Use Pheasant Tail to tie the shellbacks of patterns that incorporate halfback or fullback style wing cases.**

## PHEASANTTAIL

The long fibres of these select centre tails provide a wide array of tying possibilities. Wrap fibres around the hook shank to form the chironomid pupa bodies or for downwings on Spratleys.

SW-0807200 Claret over Bleached  
 SW-0807460 Light Olive over Bleached  
 SW-0807070 Olive Dun over Bleached

## SUPER WHITE BEADS

Superwhite Beads are perfect for imitating the prominent white gills common to chironomids. The stark white colouration stands out in a crowd drawing fish from a distance.

*Small: 7/64" for hook size 12 and larger  
 X-Small: 3/32" for hook size 14 and smaller*

SW-0701101 Small 7/64"  
 SW-0701104 Extra Small 3/32"

**In stained waters Superwhite Beads shine where traditional yarn or herl gills often foul and discolour reducing their effectiveness.**

## CRYSTAL CHENILLE

Use this very versatile material to add creative new twists to stillwater patterns. Spin a length of Crystal Chenille together with a Sparkle Blend dubbing loop for a scruffy translucent body with great highlights.

	Small	Medium
Brown	SW-2401211	SW-2401212
Callibaetis	SW-2401491	SW-2401492
Claret	SW-2401201	SW-2401202
Golden Olive	SW-2401061	SW-2401062
Light Olive	SW-2401461	SW-2401462
Olive	SW-2401081	SW-2401082
Olive Dun	SW-2401071	SW-2401072
Peacock Green	SW-2401561	SW-2401562

**MIDGE BRAID**

Tie a chironomid pupa body with just two strands of Midge Braid. Vary the tying thread colour to make subtle changes to the fly's final colour.

- SW-2402120 Black
- SW-2402210 Brown
- SW-2402500 Burnt Orange
- SW-2402570 Crimson
- SW-2402090 Dark Olive
- SW-2402580 Summer Duck

**Fine copper, silver or gold wire ribbing provide a silhouette against the flatness of Midge Braid.**

**MIDGE GILL**

This supple, durable tri-lobal yarn provides subtle reflective highlights. Midge Gill is ideal for duplicating the prominent white gills common to chironomid pupa.

- SW-2405000 White

**MIDGE FLEX**

The slightly transparent nature of Midge Flex enables tyers to alter the final colour of a chironomid pupa, larva or other stillwater invertebrate using tying threads.

Summer Duck	SW-2403581	SW-2403582

**MIDGE STRETCH FLOSS**

These colours were selected specifically for use in chironomid pupa patterns. Trout focus on colour and size particularly when there are more than one species emerging simultaneously.

**Use a little less Sparkle Blend Dubbing for the body, then tease it out to create a more life-like swimming motion.**

**SPARKLE BLEND DUBBING**

The colour selection, fibre length and texture of this special dubbing blend were designed to create the perfect dubbed leech body and other stillwater imitations.

**SOFT BLEND DUBBING**

Stillwater Soft Blend was designed for small patterns. A blend of both natural and synthetic fibers, Soft Blend reflects light suggesting the life-like qualities of a wide variety of stillwater prey including scuds, damsel fly nymphs, and mayflies.
